

LIVE @ ERS

ERS CONGRESS  REPLAY

Live@ERS and ERS congress Replay are services that provide live remote access to all sessions at the ERS International and a portal to view recordings of any of these sessions for up to three months after the Congress has finished.

The service is very easy to use with a simple email-based log in, a full programme of available sessions searchable by speaker, topic, day, key word or disease area. There is a brief case function to store interesting videos for watching later and an alert service that you can set to let you know a live session is about to start.

This resource is very popular, the replay service has been accessed over **750,000** times and the live sessions were visited **60,000** times during Congress.

We offer our partners the opportunity to purchase voucher access to this service for distribution to healthcare professionals around the world.

You can purchase vouchers directly from the ERS office for **150 Euros** per voucher reducing to **100 Euros** per voucher for orders of over 200.

Help us share the highest quality education in respiratory medicine to respiratory professionals who can't attend the ERS congress this year.
